Preface

This publication was first published in 1987 with an analysis of 1985 data. Originally, the intent was to present an overview of the co-operative system in Canada to a wide and diverse audience. However since 1995, this publication was transformed and replaces "Co-operation in Canada," which had been our main publication for more than 60 years.

Data on co-operatives are presented by group. Non-financial co-operatives are divided by membership: i.e. producers, consumers and workers. Credit unions and *caisses populaires* are looked at separately even if their membership is made up of consumers.

Methodology

The statistics used in this publication are based on two sources:

- reporting by non-financial co-operatives to the Canadian Annual Survey on Co-operatives
- similar information collected by provincial governments.

Because it is not realistic to collect information on 100 percent of the non-financial co-operatives, estimates are used for non-reporting co-operatives deemed to be still active. However estimates were made only for those co-operatives for which data were collected within the past five years.

Index Sources for Bar charts

Index 1	GDP Deflator (1992=100), Statistics Canada.
Index 2	Farm Input Price Index, Statistics Canada, Publication 62-004
Index 3	Consumer Price Index, Statistics Canada, Publication 62-001

Note: In the tables, itemized sums may not equal totals because of rounding.

CO-OPERATIVES IN CANADA

SITUATION - 2001

The 2001 statistics are based on data received from 5,678 non-financial co-operatives representing 5.0 million members, $29.5 billion total revenues and $17.9 billion in assets. These co-operatives employed almost 87,000 people of which 75 per cent were full-time employees. This includes data provided by wholesale co-operatives and federations. Of these co-operatives 976 have an agricultural base, and represent 474,449 memberships and employ 38,387 individuals with total revenues of $18.2 billion and assets of $7.1 billion.

The number of non-financial co-operatives reporting was down 2.5 per cent from 2000, however total membership was up 6.0 per cent mostly due to an increase in memberships in the consumer co-operatives area. Volume of business was down 2.3 per cent while assets were up 2.7 per cent. The number of employees was up 9.1 per cent mostly due to an increase in employees of production and service co-operatives from Québec.

The number of agricultural co-operatives reporting was up 4.6 per cent, and active membership was up 1.4 per cent. Volume of business was down 6.7 per cent and assets rose 2.9 per cent. The total employees of agricultural co-operatives increased 3.9 per cent.

PRODUCER CO-OPERATIVES

Co-operatives play a crucial role in the agricultural sector of the Canadian economy, especially in farm supply and in the processing and marketing of grains and oilseeds, dairy products, poultry, fruits, vegetables, livestock, honey and maple products.

Agricultural marketing co-operatives are, for the most part, modern enterprises that use the latest technology and are involved in processing and value added. A few large co-operatives make up the largest part of total revenues including Agropur in dairy, Saskatchewan Wheat Pool in grains and oilseeds, Lilydale in poultry and Coopérative Fédérée de Québec in meat and poultry processing. The 165 marketing co-operatives reporting represent a major economic force with a combined business volume of more than $14.3 billion and assets of $5.4 billion. In 2001, they marketed over $10.7 billion in agricultural products in Canada and abroad, (See Table 4).

Market share of agricultural marketing co-operatives is strongest in three areas, poultry and eggs 49 per cent and grains and oilseeds 45 per cent and dairy 42 per cent. In farm supply the strongest areas are fertilizers and chemicals 41 per cent, petroleum 32 per cent and feed supplies 15 per cent. (see Appendix F).

In **farm supply**, co-operatives play an indispensable role in the provision of farm inputs. They provide member co-operatives and producers with a broad range of farm inputs including fertilizers and chemicals, animal feed, seed, building materials and petroleum products. The 240 supply co-operatives reported total revenues of $3.6 billion, up 8.3 per cent from 2000.

Seven of the Top 10 agricultural co-operatives in Canada are marketing organizations and three supply co-operatives round out the Top 10. (See Appendix I).

There were 60 **fishery** co-operatives responding to the survey, three more than in 2000. They reported $232.1 million in revenues, a 2.9 per cent increase over 2000. Assets increased 22.7 per cent to $93.1 million. (See Tables 10 and 11).

Production co-operatives include **feeder, grazing, agricultural machinery, animal reproduction, forestry and handicraft** co-operatives. The 597 production co-operatives responding to the survey reported a combined

volume of business of $746.1 million. Production co-operatives in Québec and Alberta accounted for 75 per cent of the total volume of business. In Québec, revenues were derived primarily from the sale of forest products, while in Alberta livestock (cattle and hogs) was the primary activity. Saskatchewan has the largest number of production co-operatives, with 210 organizations reporting. Management of farm feeder operations and grazing operations were the two main activities of production co-operatives, with 152 and 150 enterprises respectively, accounting for 51 per cent of all production co-operatives, (See Tables 12 and 13 and Appendix B).

CONSUMER CO-OPERATIVES

At the local level, **consumer** co-operatives vary in size and sophistication, from small buying clubs, to large supermarket organizations and wholesalers. At these "conventional stores", sales are made in the usual manner and any "surplus" is returned at year's end based on patronage. Revenues from the consumer group amounted to $8.9 billion, with food products accounting for 45 per cent of the total. Petroleum products, dry goods and home hardware were the other main items sold, (See Table 6).

The 295 member co-operatives of Federated Co-operatives Limited and 34 associate members had total revenues of $3.3 billion, giving them the strongest presence in any region in Canada and placing them first by revenues of all non-financial co-operatives. Calgary Co-op Association Ltd. is the largest consumer retail co-operative in North America, with nearly 40 per cent of the local retail market. Sales include food products, hardware, clothing, furnishings, petroleum products and building materials, as well as travel services and pharmaceuticals. Mountain Equipment Co-op (MEC), headquartered in Vancouver, British Columbia, specializes in the sale of equipment for outdoor activities. It provides a catalogue sales service and operates four stores outside British Columbia, in Toronto, Ottawa, Calgary and in Halifax. MEC lists over 1.6 million members across Canada.

The 136 member co-operatives of Co-op Atlantic had revenues of $512 million. Twenty-six former member co-ops of Co-op Atlantic have formed a new federally registered co-operative, Consumers Community Co-operative (CCC). These and other major changes introduced in 2001 will continue to consolidate and strengthen local member ownership within the consumer co-operative network in Atlantic Canada.

Although not as large or influential, Québec and Ontario consumer co-operatives are strong organizations, however, they have little penetration in large urban areas.

A diminishing number of consumer co-operatives operate as **"direct charge"** co-operatives. In 2001, 20 of these co-ops reported to the survey, most of them located in Québec, New Brunswick and Nova Scotia. They reported revenues of $126 million with 19,969 active members. The concept of the "direct charge" system is that goods are provided to members at cost and a weekly service fee is charged to cover operating costs. Some add a surcharge to build capital for the development of the co-operative. In the past year a number of these type in the Atlantic region have amalgamated into the "basics" store concept under the Consumers Community Co-operative.

Student supply co-operatives have gained a strong foothold, especially in Québec, where 108 are active. These co-operatives reported a volume of business of nearly $129.7 million with 572 thousand members. They provide the various goods students may require, from stationery to textbooks. Several student supply co-operatives operate cafeterias and offer driver education courses. (See Appendix A).

Service co-operatives make up the largest number of co-operatives in Canada and 4,101 responded to the survey, accounting for 72 per cent of all non-financial co-operatives. They reported a volume of business of $1.7 billion, up 6.3 per cent from 2000.

The largest single area of co-operative activity in the service sector is **housing** co-operatives where 2,099 housing co-operatives reported with assets of $5.7 billion and 112,186 members. There are other types of co-operatives involved in housing activities and 65 of these other housing co-operatives reported to the survey. Most of them are co-operative housing resource groups involved with development of emerging housing co-operatives. The concept of equity housing

co-operatives which are involved with the management of common assets, exists only in British Columbia at present (See Appendix C).

There are two types of **child care** co-operatives: **daycare** and **nursery school** co-operatives. Daycare co-operatives are formed by parents to provide daytime care for their children while the parents are at work. Nursery school co-operatives are formed with an emphasis on education and social interaction but also provide the parents with time for other pursuits. Child care co-operatives are found in greatest numbers in Ontario, Saskatchewan and Manitoba. We find 410 daycare and nursery school co-operatives reporting revenues of $54.6 million with 27,412 members.

Health care co-operatives play an important role in a number of communities across Canada and 77 health care co-operatives reported to the survey with 40,648 members and revenues of $100.4 million. Home care co-ops are found mostly in Québec where many incorporations of this type have taken place in the past few years and 36 reported for the 2001 survey. The home care concept is as it's name suggests providing care to mostly elderly people in the home environment.

Community development co-operatives foster local leadership skills and grassroots participation in innovation and solving social and economic problems. These co-operatives are found throughout Canada but most are in Saskatchewan. There were 267 development co-operatives reporting with 18,970 members, assets of $32.6 million and revenues of $30.4 million, an increase of over 15 per cent.

Funeral co-operatives are located mostly in Québec, although they have made some in-roads in the Maritimes particularly in Prince Edward Island and New Brunswick. Fifty-seven funeral co-operatives reported assets of $98.1 million.

Water supply co-operatives are found mainly in Alberta, Manitoba and Québec and 180 responded to the survey with 7,359 members and $7.3 million in revenues and $67.3 million in assets.

Natural gas and rural electric co-operatives are found almost exclusively in Alberta where 151 of these co-operatives reported to the survey. These co-operatives reported memberships of 157,981 and assets of $486.7 million and revenues of $282.6 million up 62.1per cent from 2000.

Although **recreational** co-operatives are found in most provinces, they are most prevalent in the West, particularly in Saskatchewan. The 294 recreational co-operatives reporting were engaged in various activities, including the management of community centres, skating and curling rinks, golf courses, campgrounds and swimming pools.

A number **transportation and communication** co-operatives are found throughout Canada. Of the 74 transportation co-ops reporting most were freight co-ops and taxi co-ops. They had revenues of $70.3 million and assets of $42.9 million. Recently auto (car-sharing) co-operatives have been formed in large urban centres including Vancouver and Toronto, supplying their members with shared vehicles on a needs basis and saving members the high costs of owning an automobile ($9,000 average per year), reducing congestion and in turn reducing pollution. Most of the 79 communication co-ops reporting were of the radio TV/cable and editing and publishing type. They reported 64,811 members, revenues of $74.3 million and assets of $101.2 million (For other service co-operatives, see Appendix C).

WORKERS' CO-OPERATIVES

Workers' co-operatives are employee owned and most of these are located in the province of Québec. Canada wide, 286 reported with a total of 17,330 members and revenues of $594 million, assets of $368.4 million and 11,413 employees, with 94 per cent working on a full-time basis. These co-operatives operate in a wide variety of fields, as the following examples show.

Founded in 1960, the *Coopérative Laterrière* is the largest forestry co-operative in Québec and also the largest workers' co-operative in Canada, this co-operative was the first workers' co-operative to be listed in the "Top 50 co-operatives in Canada". The *Coopérative Laterrière* operates a sawmill and tree nursery and exports part of its production, primarily to England, It is owned by its 745 members and has 890 employees.

Forestry co-operatives accounted for 65 per cent of the overall volume of business of workers' co-operatives in Canada, a total of $386.1 million, (See Appendix D).

The *Coop des inséminateurs du Québec* (The Québec Artificial Insemination Co-operative) generated the most revenues among non-forestry workers' co-operatives in Canada.

In recent years, a new type of workers' co-operative has been developed in Québec, the **worker/shareholder co-operative**. Employees can form a co-operative to buy shares in an existing business. This enables them to have a voice at the board of directors level. Ninety-nine of these co-operatives are now active in Québec. The increasing interest in workers' co-operatives reflects the shortage of jobs and the determination of educated and informed people in having more control over their jobs and, consequently, their lives and communities.

Another type of co-operative gaining in popularity in Québec is, the **multi-stakeholder** or **solidarity co-operative**. Membership is made up of different categories of partners: service users, employees and community organizations. Almost non-existent a few years ago, in Québec 150 multi-stakeholder co-operatives were incorporated by 2001. Many provide home care services to seniors and people with minor health problems.

FINANCIAL CO-OPERATIVES

CREDIT UNIONS AND CAISSES POPULAIRES

Credit unions and ***caisses populaires*** are in all the provinces. They reported assets of $130.7 billion, an increase of 7.1 per cent over 2000. Québec accounts for nearly 50 per cent of this figure. (For more details, see appendices G and H.

INSURANCE AND OTHER FINANCIAL CO-OPERATIVES

Insurance co-operatives rank with the largest companies of their type in Canada. Eight co-operative insurance companies have over $18.9 billion in assets and provide service to nearly 10 million policy holders.

Two **trust** co-operatives exist in Canada and they administer over $156 billion in assets.

1/ Basic function? If the good or service is produced by the members and sold through the co-operative, it is considered marketing.

If the good or service is supplied by the co-operative and sold to its members, it is considered consumer.
The two broad groups are broken into subgroups, or activity, according to overall function.

[1/] Market share for marketing sales by co-operatives is calculated at the farm gate.

[2/] Market share for grains and oilseeds sales by co-operatives is calculated by dividing the volume of grains and oilseeds handled by cooperatives by the total volume handled (Source: Producer Marketings - Western Canadian Grains, The Canadian Wheat Board 2000-01 Statistical Tables). All other market shares are based on farm cash receipts (Source: Statistics Canada Cat. No. 21-001-XIB).

[3/] Market share for farm inputs is calculated at the retail level. The figures used in this calculation do not include revenues of wholesale co-operatives.
